X₃

X₃

Desirable

Beauty and aesthetics keep playing an important role nowadays.

Luxura has been a synonym for attractive and fashionable design for years now, which the complete product line shows. The X₃ proudly prolongs this statement with a desirable design that awakens your appetite for more!

Colour tones

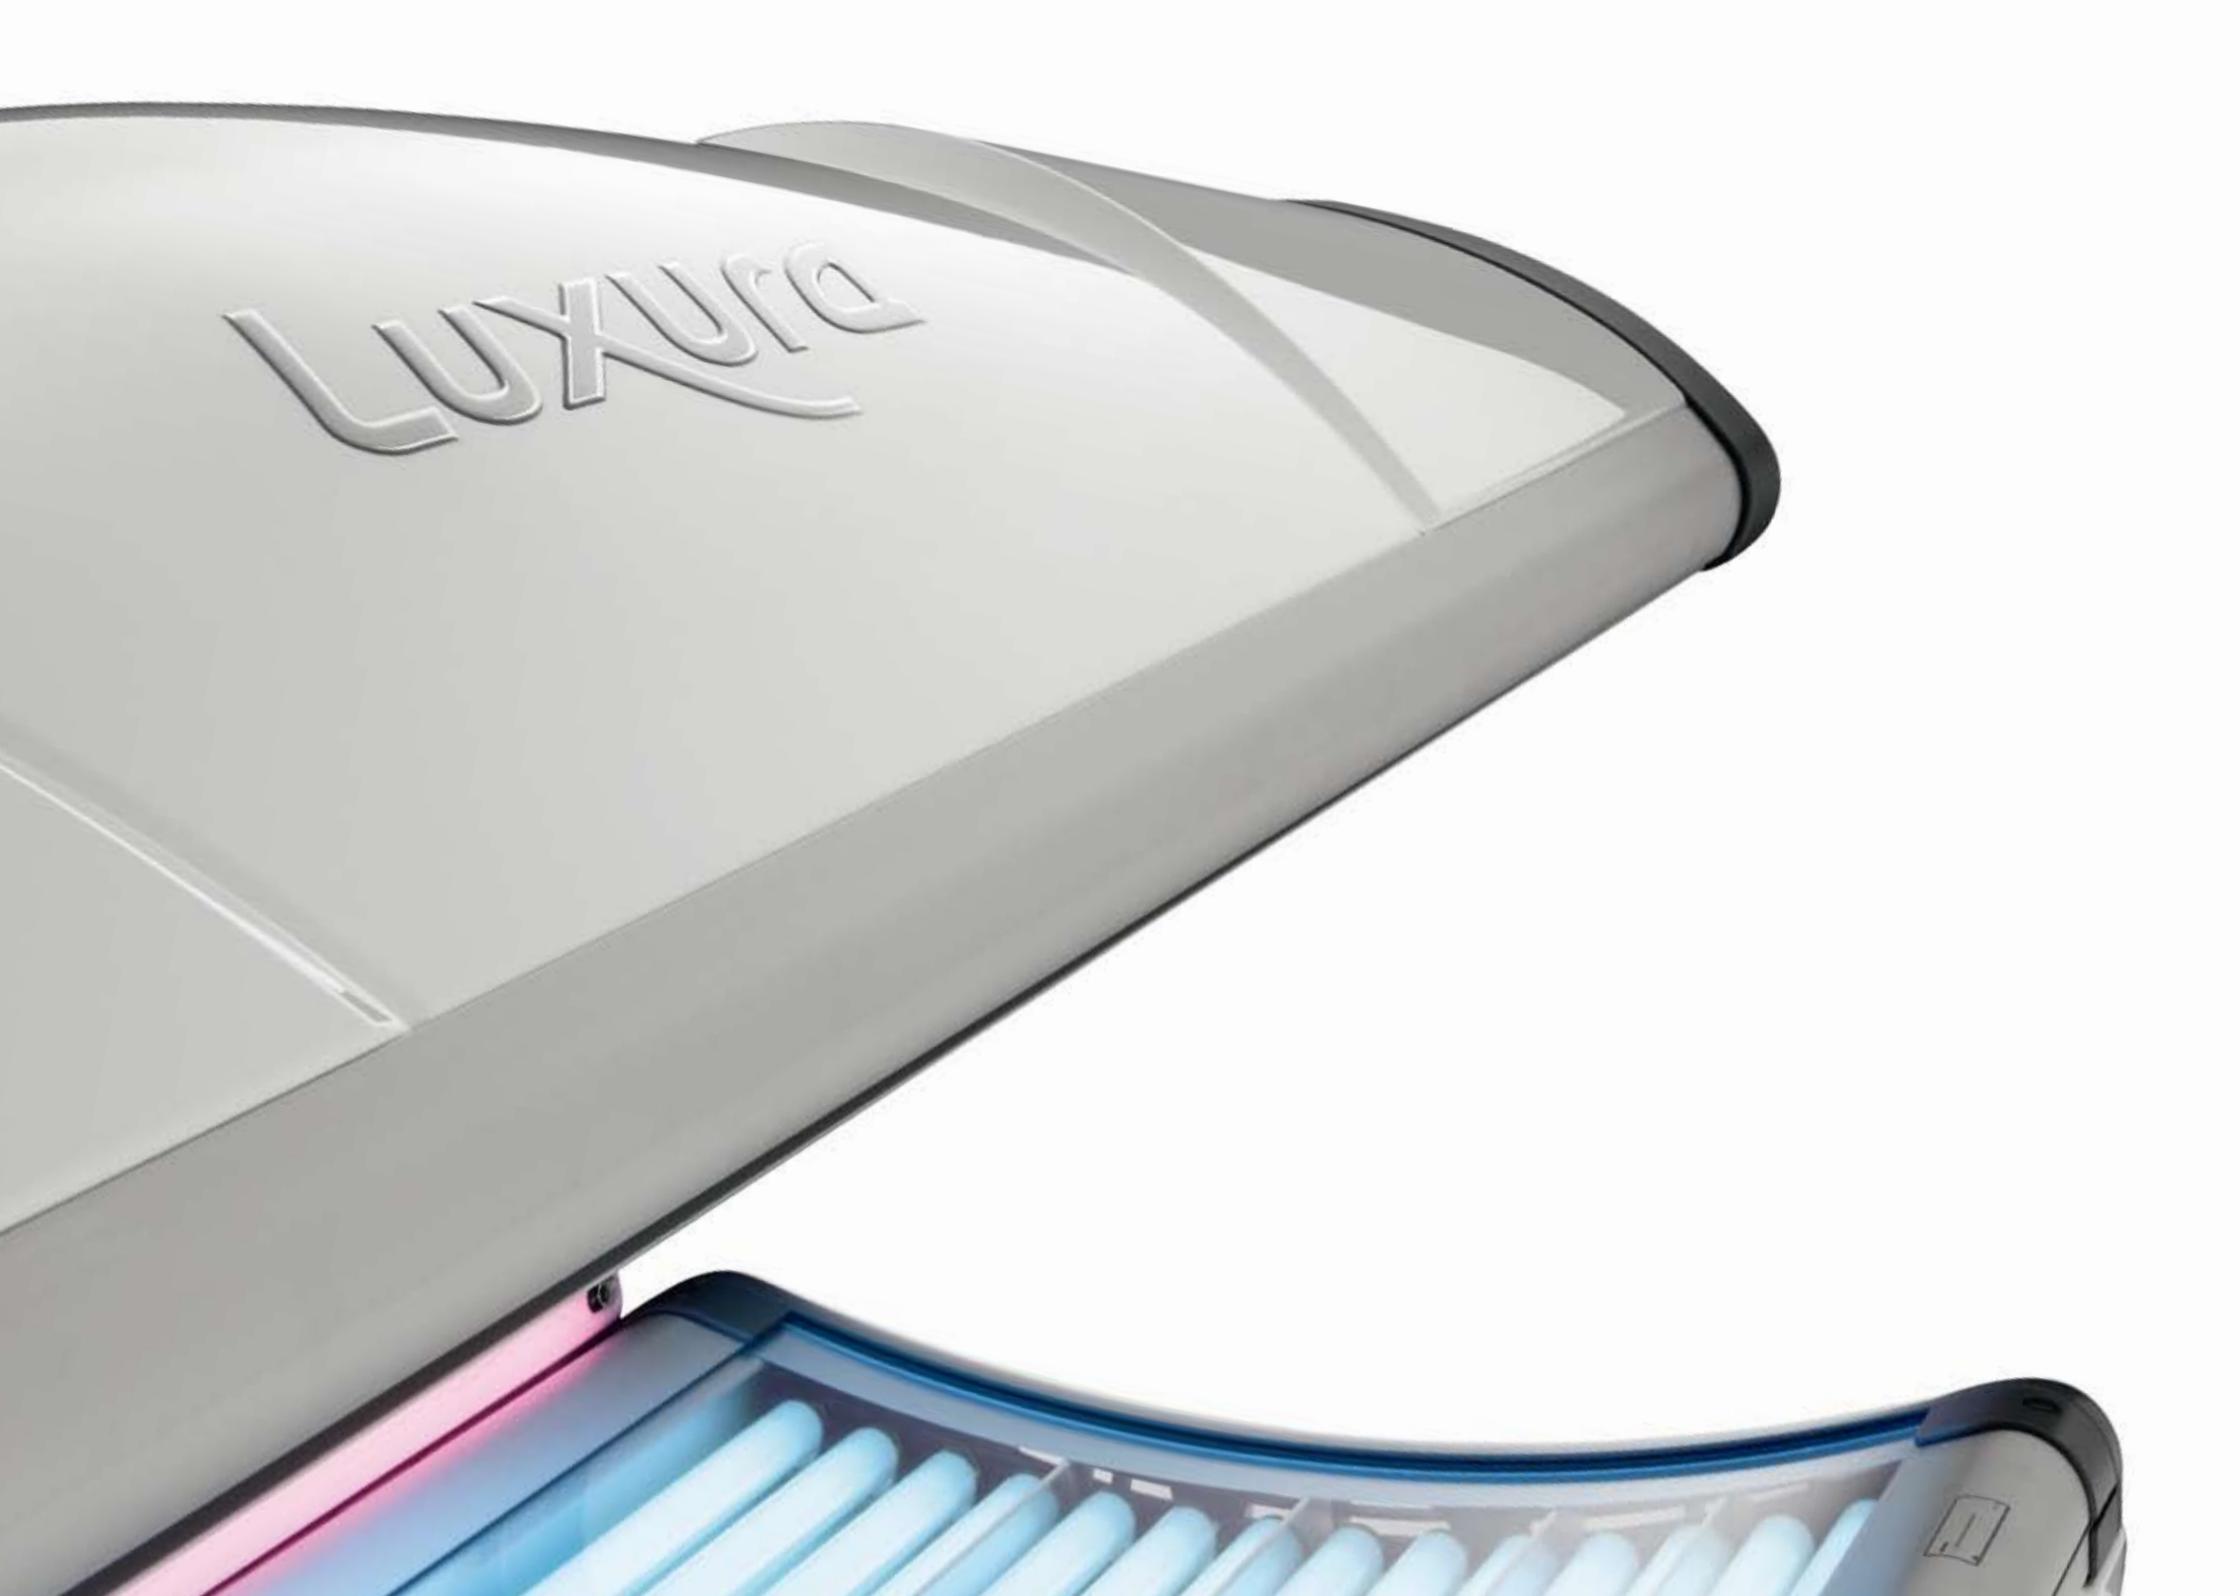

A stylized logo consisting of a large, bold 'X' with a smaller '3' positioned below it to the right.

The self-confident appearance of the Luxura X₃ is not least down to a choice of colours that reflects the very latest trends. Its already wonderful appearance is further underpinned by an atmospheric DecoLight (optional). Pearl White seduces with DecoLight in warm pink, Lagoon Blue refreshes with DecoLight in turquoise, and Fuchsia Pink appeals with DecoLight in violet. Fashion colours combined with an atmospheric aura of light make the new Luxura X₃ the highlight of any tanning studio or spa area.

The attractive lighting concept with the integrated decorative lights ensures an additional sense of well-being before the tanning session, giving the unit an attractive appearance, even in stand-by mode.

Luxura

X₃

Power play

Relaxation, wellness and pure beauty - experience them all with the Luxura X₃.

A few finger movements are all that's needed to control the body and face coolers or deactivate the facial tanner. Integrated in the Decoshield plus (optional) you will find an interface for a personal MP3 player to provide unlimited musical enjoyment in combination with the SoundBox.

Here, sun bed users can log in their personal MP3 player and experience their own sounds.

Selective

Luxura X₃ knows what you want. The electronic ballasts, which are equipped in each model, optimise not only the tube configuration; they also generate energy savings of around 25%. And the different tube configurations certainly let you be choosy. Select from the 30 SLi, the 30 SPi, the 32 SLi or even a 32 SLi Intensive - the latest in the product class is a true highlight and a real power package. Depending on the layout, the facial tanners vary between one and three 400 watt lamps, while the SPi version has 9 x 25 watt spaghetti tubes.

A closer look

The design of the Luxura X₃ provides sun worshippers not just with a high degree of comfort. The electronic ballasts - integrated as standard - ensure energy savings of at least 25% and prevent the tubes from blackening thanks to an automatic starter. Hapro offers a central air exhaust option to duct the warm air from the top of the device outside the room. During maintenance, too, the benefits of sophisticated technology are clear. The "Easy clean" click profile at the front is an aluminium side element, which folds away with a simple click, allowing easy and thorough cleaning of the lamps and the acrylic sheet.

● = As standard; ○ = Optional; ¹Only in combination with 'Decoshield plus'

Deco caps

The Luxura X₃ comes with a choice of three different decorative screens. "Deco caps" are fitted as standard...

Decoshield

... in the configuration "Decoshield" provides a silver screen for an integrated, unified look.

Decoshield plus

This version comes with a high quality decorative screen. Both Decolight for stand-by mode as well as My MP3 and SoundBox are integrated.

The body cooler at the foot end is fitted as standard and ensures a pleasant temperature.

For the super cool, the Luxura X₃ can also be fitted with a separate face cooler at the head end.
